As a Java Software Developer with over 4+ years of experience, I am driven by a strong desire to learn, grow and excel. I am eager to contribute to the company's success by bringing efficiency, attention to detail, and a proactive approach to every project

Skills

Technical Skills: Core Java, Spring MVC, Spring Boot, Rest APIs, Web Services, Microservices, JAX-RS

Database: SQL, Squirrel

Tools: Kibana, Soap UI, PostMan, Splunk, Datadog, Jira, GitLab, RTC, OpenShift, Microsoft Visio, Gradle, Maven

Domain: Insurance, Banking

Experience/Projects

TCS- USAA Client

April 2022 – Present

System Engineer

Pune, Maharashtra

- The project focuses on developing a comprehensive insurance application system from the ground up.
- Coordinating the work among team members and consolidating the regular updates to provide a better handoff to the onshore counterpart.
- Migrating old classic Java applications to the Talon Open Liberty platform involves refactoring legacy code to integrate Jakarta REST service.
- Deploying the code using git commands and monitoring the pipeline to ensure successful deployment.
- Creating merge requests, addressing Sonar Qube quality issues, resolving review comments, ensuring all pipeline jobs passed, and validating APIs for functionality and compliance.
- Experienced in using Microsoft Visio to create detailed flowcharts and diagrams for various projects.
- Updated the old classic Java code to Spring Boot version 3 and Java 17, making it faster, more secure, and easier to work with modern tools.

Nelito - SBI Client

November 2020 – April 2022

Software Developer

Navi Mumbai, Maharashtra

- Worked with the SBI client as part of the Enterprise Document Management System Team, managing the development division for the Central Know Your Customer (CKYC) project.
- Involved in all stages of the software development cycle, consistently applying Agile methodologies to ensure efficient and iterative progress.
- Developed source authentication encryption logic using the AES GCM 256 algorithm to ensure secure data transmission.
- Developed Java REST APIs for document upload, soft delete, update, search/download, and transfer using the Spring MVC architecture.
- Developed a bulk upload utility using Java technology, enabling the simultaneous upload of multiple documents in a single instance.
- Worked with IBM FileNet 5. x to analyse and create object stores and property templates for managing document metadata within the FileNet tool.
