Experience

Jul 2021 to Now

Fliplearn Education private limited.

Team Lead

Fliplearn is an Online Learning Transformation System that is aimed at helping schools to redefine their teaching and learning processes. In fliplearn I worked on Scalability, Stability and security of system. And design/developed many components like recommendations to teacher, Activity creation and publish, Check homework, Learning profile of student.

Scaled system and handled 175K users with a time span of 5 mins.

Jul 2014 - Jun 2021

Incaendo Technologies Pvt Ltd

Sr. Software Engineer

I joined incaendo technology as software engineer, And worked for many clients like shop-clues, policy bazaar, activate media and many more. Here I worked with team members for project and learned power of team management.

In 2016 I promoted to Sr. Software Engineer and developed cross platform mobile applications, Web applications in angular and python.

In 2018 I promoted to team lead, And worked for high scalable products. Started designing of components, systems, and worked on security level of application. I got chance to work for e-commerce and payment systems.

June 2013 - Jul 2014

Webixion Technologies Pvt Ltd

Software Engineer

After Completing training, I joined Webixion technology as software engineer. Here I worked for many clients and learn to develop scalable and quality softwares.

Jan 2013 - June 2013

Advansys Solutions Pvt Ltd

Software trainee

I joined Advansys solutions in 2013 from my college as a software trainee, and learned web technologies (PHP, HTML, Javascript, Ajax, CSS .. etc)
