PROJECTS

SCE Common Migration (Client : LF Logistics)

- We migrated Angular 4 Application to Angular 11 version.
- Migrated common libraries and deployed to NPM repo.

POMS (Client : LF Logistics)

- We are developing this application to create/book, track and manage the orders from the clients so that the vendors are able to provide goods and forwarders will deliver it
- Developed Angular 4 modules, controllers, directives and services to implement key functionalities of POMS Application.

AMP Application (Client: Avis Budget Group):

- We have developed this application to convert every logic written in COBOL for Adjustment History, Monetary and Non-Monetary updates of car rentals into JAVA.
- Developed Microservices, Angular Screens for the Adjustment History, Monetary and Non-Monetary updates of car rentals.

Weather Bot (Personal project): [🔗](#)

- Developed Weather Bot using Angular 7/8, JSPDF, DialogFlow and deployed in firebase cloud platform..
- It says about the weather report of all cities.
- Website Link : Access it by clicking the provided hyperlink icon.

CERTIFICATIONS

Certification on Agile.

TCS

Certification on Angular 7/8.

Udemy

Certification on Java(Spring boot),Hibernate,JPA, RESTful API.
