CARRER OBJECTIVE

Results-oriented Java Developer with 3 years of experience in Core Java and Java 8 features. Skilled in building robust applications using Spring Boot, MySQL, and Oracle, with a focus on high-performance RESTful APIs. Proficient in Postman, GitHub, and Swagger, ensuring efficient collaboration and development. Committed to delivering high-quality solutions that adhere to best practices and drive project success.

PROFESSIONAL SUMMARY

- Responsible for designing and implementing Restful web services using Spring Boot, including the creation of controller, services, and repositories.
- Good understanding of exception handling, API validations and HTTP request/response management.
- Ensured proper communication and data exchange between microservices.
- Responsible to test the functionality of the API end points in Postman, and verifying that the API meets the requirements.
- Handling and logging exceptions that occurs during the execution the API and returning appropriate error response to the client. Proficiently used Git and Gitlab for version control and collaborative development. utilized Postman for API testing and debugging.
- Having good understanding of software development lifecycle (SDLC) and agile methodologies for project delivery timelines.
- Performing JUnit and TestNG for testing .
- Using Jenkins and Cloud Bees for continuous integration and deployment process.

WORK EXPERIENCE

Project : ECOMM (British Telecom)

Dec-2022– Till Date

Role: Backend Developer (Spring Boot)

Tata Consultancy Services Pvt. Ltd.

Responsibilities:

- Designed and developed Java-based applications, leveraging Core Java and Java 8 features to ensure efficient and robust code.
- Developed RESTful APIs and Web services to facilitate seamless communication between different modules of the applications.
- Managed the full software development lifecycle, including requirements gathering, analysis, design, coding, testing, and deployment of robust solutions.
- Developed unit test cases for verify report functionality using JUnit, Mockito, and Rest Assured.

- Worked with technologies such as RabbitMQ, Kibana, Git, and Elasticsearch.
- Implemented Spring Boot framework to build RESTful APIs, enhancing the functionality and performance of web applications.
- Collaborated with frontend developers and QA teams to ensure seamless integration and delivery of high-quality software products.

Project : FCA_Supplychain , FCA_Manufacturing (Stellantis)

May-2021– Oct-2022

Role: Backend Developer (Java)

Tata Consultancy Services Pvt. Ltd.

Responsibilities:

- Implemented new features and functionalities, collaborating with cross-functional teams to ensure alignment with project requirements.
- Conducted code reviews and performed debugging to identify and resolve software defects.
- Trouble shooting interface of the application and debugging application code.
- Worked in an Agile Methodology, collaborative environment to receive design requirements, peer program and test appliances.
- An end-to-end development and deployment of solutions.
- Handled defects and task and provide solution on given time line

KEY SKILLS

- | | | |
|-------------|---------------|---------------|
| • Java | OOP's | MongoDB |
| • Cache | Design Patter | RESTful API's |
| • SQL | CI/CD | Agile |
| • OpenShift | Spring Boot | SonarQube |
| • Postman | Swagger | Sonar Lint |
| • Kafka | log4j | Confluence |

EDUCATION

IES College Of Technology Bhopal (7.31 CGPA)

2015-2019

Bachelor of Engineering, (Computer science & Engineering)
