## PROFESSIONAL SUMMARY

- Having 3 years of professional experience in developing various object-oriented programming (OOPS) and web-based enterprise applications using Java J2EE/J2ee technologies and working on full software development cycle (SDLC).
- Responsible for creating and maintaining architecture for **Restful API ,Restful Web Services** using **Spring Boot**
- Good understanding of common API technologies, such as **Spring Boot** and **Spring MVC**.
- Experience in the Agile (SCRUM) Development Process.
- Experienced in developing complex SQL queries, in various (RDBMS) relational databases such as Oracle, and MySQL.
- Experience in Core Java, Multithreading, Collections and JDBC.
- Experience in application/web servers like Apache **Tomcat WebServer** .
- Used Spring Boot Actuator to monitor and manage the application in a production environment.

## TECHNICAL SKILLS

- Java -8
- Core Java
- MySQL
- Spring
- SpringBoot
- Hibernate
- HTML/CSS
- JSP
- JavaScript
- JPA
- JDBC
- Servlet
- Github, GIT
- Multithreading
- XML and JSON

## EXPERIENCE

**Web Earn Solutions Pvt Ltd**— *Java Software Developer*

02/2021 – PRESENT

## PROJECTS

### 1: Online Health Insurance Services

**Client:** Raffles Health Insurance Pvt Ltd, Singapore

**Environment:** Spring Boot, Spring, Hibernate, Collection Framework, Core Java ,Java-8

**Database:** MySQL.

**Description:** Designed and developed an online health insurance services application that increased customer satisfaction by enabling customers to inquire about and subscribe to health insurance policies from different companies. The application allows customers to log in and check the policy and plans with minimal effort, and when they need to claim, customers can easily search for a hospital nearby and get the money from the credit manage

### Responsibilities:

- Developed a REST API with Spring Boot Framework that allows users to create and manage their accounts, resulting increase in customer signups as measured by Google Analytics.
- Designed and developed REST -based using Spring Boot that met performance metrics of less than 10 ms response time

## BUILD TOOLS

- Docker
- Maven

## IDE & GUI

- STS
- Eclipse
- Visual Studio

## Operating System

- Windows

- Designed and delivered an efficient, customer-centric online health insurance service that increased customer satisfaction and retention
- Reduced DAO object creation time by writing DAOs to load database tables with Hibernate instead of using SQL statements in the DAO

## 2: WorkStation Management System

**Client:** MS Technologies.

**Environment:** Spring MVC, Hibernate, JSP, Collection Framework, Core Java ,java-8

**Database:** MySQL.

**Description:** The application automates an organization's workstation and employee management system, providing access to search information, moving new hires to a new workstation through a user interface (UI), viewing payroll information department-wise, storing company information as an organization file, and finding whether an employee is active or inactive through SQL queries. Reduced the time needed to manage workstations from 10 hours to 2 hours per employee

### Responsibilities:

- Designed and developed a Restful API for different software modules in the project as per the requirement.
- Created a Spring MVC Architecture to improve web application performance and resolve issues .
- Implemented Data Access Layer using Spring Data and Hibernate ORM tool and enhanced system performance .
- Improved the web application's performance scalability and robustness by designing, developing, and configuring Spring Bean Wiring, Spring DAO, and Spring AOP modules.

## EDUCATION

- S.D College of Engineering and Technology (Muzaffarnagar) , B-tech (Computer Science)
- S.G.R.R Public School 12<sup>th</sup>
- M.G Public School (Muzaffarnagar) 10<sup>th</sup>

## LANGUAGES

Hindi, English

## PERSONAL DETAILS

Nationality : Indian

Sex : Male

Designation : Java Full Stack

Address :  
Indrapuram  
(Ghaziabad)
