## SUMMARY

Highly skilled and detail-oriented DevOps Engineer with 2 years of experience in Kubernetes, Ansible Automations, Docker Containers, Deploying production level applications. Proficient in bash/shell scripting, manage & maintain production clusters, troubleshoot and database management systems. Strong problem-solving skills and ability to work effectively in a team-based environment.

## SKILLS

- Kubernetes
- Ansible Automations
- Docker
- CI / CD - Jenkins
- Bash / Shell Scripting
- git / github
- Terraform
- Openshift
- Python
- YAML
- Azure Kubernetes Services
- Azure & Google Cloud Computing
- Onboard dashboards - Rancher, ELK, Grafana, Jio-observability
- DB - Redis, Mongo, SQL

## WORK EXPERIENCE

### ACL Digital

#### Reliance Project (Client Site)

Devops Engineer • 2021 - Present

- Manage and optimize Kubernetes, Docker, and CI/CD pipelines.
- Oversee Kubernetes clusters, nodes, pods, containers, services, networking, replicas, and logs.
- Expert in troubleshooting Kubernetes clusters, nodes, and application-related issues.
- Create and manage Ansible scripts and YAML files for efficient deployment, services, installation, and updates.
- Proficient in database management on servers and connecting databases with services.
- Ensure high availability and traffic optimization within Kubernetes clusters using Load Balancers and NGINX services.
- Provide adept troubleshooting for Kubernetes and Docker service-related issues, delivering essential cluster services.

## EDUCATION

### Management of Business Administration

IT Project Management • 2022–2024

### Bachelor of Engineering

Computer Engineer • 2017–2021

## CERTIFICATIONS

### Oracle Cloud Infrastructure

Oracle Foundation • 2023

### Oracle Cloud Data Management

Oracle Foundation • 2023

### Oracle DevOps Professional 2023

Oracle Foundation • 2023

### Ansible Advanced Course

KodeKloud • 2023

### Certified Kubernetes Administrator

KodeKloud • 2022

### GIT for DevOps

KodeKloud • 2022

### Docker Training Course

KodeKloud • 2022

### Bash Scripting

KodeKloud • 2022
