

JAVA DEVELOPER

DINESH KUMAR PARIDA

|| ☎ 9337219836 || ✉ dineshparida23@gmail.com ||

PROFESSIONAL SUMMARY

I have **2+ years** of professional experience in development and of web-based enterprise applications using Java/J2EE technologies Like **Core java, oops concepts, Java 8 features, Collections, Spring Boot, Spring MVC, MySQL Database and Hibernate, JPA, Microservices, Webservices, Postman, html, CSS, Bootstrap** Etc.

TECHNICAL SKILLS

SKILL	SUB CATEGORY
Primary Skills	Core Java, Java8, OOPs, Collections, Hibernate, Microservice.
Framework	Spring Core, Spring Boot, Spring MVC,
Databases	MySQL, PostgreSQL
Tools	STS, Eclipse, IntelliJ IDEA, MySQL Workbench, Postman, Maven, VS Code
Frontend	HTML, CSS, BOOTSTRAP
Development Methodologies	Agile, Scrum, Jira

EMPLOYMENT DETAILS

COMPANY NAME	BIGPERL SOLUTIONS PRIVATE LIMITED
TOTAL EXPERIENCE	2+ Years
DESIGNATION	Associate Software Engineer

JAVA DEVELOPMENT SKILLS

- Use **Java/J2EE** technologies to develop web applications and add functionalities to existing applications.
- Experience in developing Java application with **Spring Boot**.
- Strong knowledge of **Java 8** and **Object-Oriented Programming (OOPs)** concepts.
- Experience with the **Spring framework**, including **Spring Boot** and **Spring MVC**.
- Proficiency in **Hibernate** for **Object-Relational Mapping (ORM)**.
- Understanding of **multithreading** and experience in using it effectively in Java applications.
- Familiarity with **collections** and ability to use them efficiently.
- Ability to handle **exceptions** and errors gracefully.
- Experience in writing **SQL Queries** using **Oracle** and **MYSQL** databases.
- Proficiency in **Junit** for writing unit tests and ensuring code quality.
- Ability to **debug** complex issues and optimize code for performance.

- Familiarity with **Postman** for testing **REST APIs**.
- Understanding of **REST APIs** and **Webservices**.
- Creating required **API's** in the application.
- Hands on developing applications using micro **Webservices**.
- Familiarity with build tools such as **Maven**.
- Knowledge of **Agile methodology** and experience working in a **Scrum team**.

RELEVANT PROJECTS

Project-1

Project Name- *Devshop -g Tech* **Client-** *Miro* **Team size-** *7*
Role- Java Developer **Company-** **BIGPERL SOLUTIONS PRIVATE LIMITED**
Process- Agile Scrum
Technologies- Java1.8, Spring Boot2.0, JPA, Restful Web Services, Microservice, Hibernate.
Tools- Eclipse, Postman, Jira, STS, MySQL.
Environment- Spring Boot, Restful service, Hibernate, JSP, Microservice, MySQL, etc.

Project Description-

Devshop -g Tech is a technology that enables businesses large and small to organize, automate and synchronize all aspects of their customer interactions. Examples of Devshop -g Tech systems are marketing, sales, customer service and support. Using most of his Devshop -g Tech platform, companies analyze customer interactions and improve customer relationships. we have perform some module like..

Customer Management Module
Product module
Billing module

Lead Module
Contact Module
Email Sending Services etc.

Roles & Responsibilities-

- *Requirement Analysis, Design, Develop , implement , and maintain java application using Java EE.*
- *Operated on MVC architecture.*
- *Testing and debugging of Application.*
- *Configuring database and creating Database Schema.*
- *Prepared entity class using encapsulation concept.*
- *Created Restful web services in Spring Boot with the help of @RestController and return the response object to web request as JSON.*
- *Provide authentication and access control to web requests through authentication manager in spring.*
- *Writing test cases in Junit.*
- *Utilized micro services approach to build the application.*

- Attached solution to defects communicated by testing team.
- Develop server side applications to interact with databases using Spring boot and JPA.
- Giving product demo to the client.
- Attending daily scrum meetings.

Project-2

Project Name- Calabrio 6.4

Technologies- OOPs Concepts Java 8, Spring Boot, JPA, Restful Web Services.

Tools- Eclipse, Postman, Jira, STS, MySQL.

Environment- Spring Boot, Restful service, Hibernate, JSP, Microservice, MySQL, etc.

Project Description-

A Calabrio 6.4 can give you a clear overview of your customers, you can manage everything in one place. This Software ensures that every step of the interaction with customers. We can make it to perform pre-scheduled activities like sending emails and initiating phone calls. Hence, Calabrio 6.4 stores detailed information on overall purchase history, personal information and even purchasing patterns.

Responsibilities-

- Used to Create **REST API** by using Spring Boot.
- I used to perform **CRUD** (Database operations) operations by using the **JPA Repository**.
- Analyzing the specific process requirements.
- Handling the **exceptions**.
- I used to use the **Java 8 Stream API** to process Large Data.
- Writing the queries on the **MySQL** database.
- Testing of the application using **Junit** testing & integration.
- Developed configuration files corresponding to beans mapped and backend database tables.

EDUCATION

Institution : Biju Patnaik University of Technology.

Qualification(s): BE/ B-TECH

Major Subject(s): Object Oriented Programming Language.

CONCLUSION

I hereby declare that the above information contained herein is true and correct to the best of my Knowledge.
