EDUCATIONAL QUALIFICATIONS

Bachelor of Technology IMS Engineering College

06/2017 - 08/2021

Ghaziabad

Courses

- Information Technology(84%)

PROJECT

Banco Sabadell -JFac (11/2023 - Present)

Objective:

- Integrate HLD, make microservices decisions, standardize variables, develop APIs, implement microservices, establish operational logs, conduct unit tests with mock data, and evaluate APIs for cohesive project integration.

Key Responsibilities:

- Design and develop APIs with clearly defined endpoints in alignment with project objectives.
- Maintain documentation for all implemented microservices, APIs, and testing procedures to facilitate future reference and updates.
- Evaluate the effectiveness and functionality of the APIs by initiating requests across different layers within the project.
- Apply mock data for the purpose of conducting comprehensive unit tests to ensure system reliability.

Technologies Used:

- Spring Boot, Hibernate, MVC Architecture, RESTs API, Jenkins

Bank of America - ADS (10/2021 - 11/2023)

Objective :

- Led the development of a robust application for managing a diverse range of ADS jobs, operating on both monthly and daily schedules. Proactively incorporated new functionalities and streamlined the framework to align with specific user requirements and industry best practices

Key Responsibilities:

- Proactively resolved development and customer issues while enriching the existing framework functionalities.
- Demonstrated ability to perform effectively under pressure and consistently meet tight deadlines.
- Extensive experience working within an agile methodology, ensuring adaptability and swift responses to evolving project needs and priorities.

Technologies Used:

- Java, Spring Boot, MySQL, RESTful API Development, Version Control: Git, Agile/Scrum Methodology

WORK EXPERIENCE

Custom Software Engineering Analyst Accenture Pvt. Ltd.

10/2021 - Present

Achievements/Tasks

- Applied Spring Boot in conjunction with JPA for efficient and effective application development.
- Engage in crafting and evaluating APIs to guarantee their smooth integration into the project's structure.
- Designed and put into action a set of stored procedures, improving database performance.
- Implemented Shell Scripting and Autosys to automate and execute a variety of tasks and job processes, contributing to increased operational efficiency.

KEY SKILLS

Problem Solving

Team Work

Time Mangement

Critical Thinking

Decision Making

TECHNICAL SKILLS

Programming Languages : Java8, JavaScript

Frameworks: Spring Boot

Database Management: MySQL, MongoDB

Microservices Architecture

RESTful API Development

Testing: JUnit, Mockito

Version Control: Git

Build Tools: Maven

Cloud Services : Azure

IDEs: Eclipse, IntelliJ IDEA, SpringToolSuit

Continuous Integration/Continuous Deployment (CI/CD):
Jenkins

Agile/Scrum Methodology

CERTIFICATES

Java Standard Edition Training certification by Tech Expressway Program

Devops Essential training certification by Cloud Guru

Web Development Training certification

AZ-900 Microsoft Azure Fundamental by Cloud Guru
