PROJECTS

Fair Point OSS AO (07/2022 - Present)

- Designed and developed software products and systems to align with business requirements, leveraging technologies such as Core Java, Spring Boot, Data JPA, and Microservices.
- Coordinated and fixed defects or performance issues within Service Level Agreements, ensuring that systems were functioning properly and meeting agreed-upon standards.
- Analyzed, designed, built, and tested new components or enhancements to existing modules, continually improving and optimizing systems for better performance and user experience.
- Collaborated with cross-functional teams, including business analysts, developers, testers, and project managers, to ensure successful project delivery and achievement of business goals.

E-Commerce Shopping Cart using java and Spring Boot (05/2021 - 07/2021)

- Leveraged Core Java, MySQL, and Spring Boot to develop an E-commerce website that allowed customers to search for and purchase products online.
- Ensured the security and reliability of the shopping cart by implementing secure authentication and payment processing functionality.

ACHIEVEMENTS

Campus Ambassador (04/2021)

Successfully promoted and organized a Coding Ninja workshop at my college, helping to inspire and educate junior students about the latest trends and best practices in coding and software development.

Treasury (03/2020 - 03/2021)

Successfully secured funding for college fests and partnered with local restaurants to organize events, contributing to the success of college fest and enhancing the overall experience for students.
