Objective

I look forward to associate myself with an organization where there is an opportunity to contribute and upgrade my knowledge for development of self and the organization served.

Profile Summary [Software Developer] CAPEGEMENI INDIA PVT.LTD

- Highly skilled and motivated Java developer with [2] years of experience in developing robust and scalable software solutions. Seeking a challenging position to leverage my expertise in Java programming, problem-solving, and teamwork to contribute to the success of an innovative organization.
- Designed, developed, and maintained Java-based web applications using Spring MVC framework
- Developed the Controller, Service layer, DAO layer using Spring boot.
- I have hands on experience in Postman, Spring boot, Java 8, Hibernate, JIRA, GitHub as part of Project assignation.
- Good knowledge of **Object-Oriented Programming** concepts.
- Experience in **Java, J2EE (Servlets, JSP), Hibernate, Spring.**
- Experience in developing applications using **RESTful services with Spring Framework, Spring with Hibernate Integration, using Maven Build tool.**
- Having good Knowledge on **Spring Boot and Microservices.**
- Good implementation knowledge on **MVC** Architecture.
- Familiar in understanding client requirements, developing & testing application as per system requirement specification.
- Excellent analytical, logical, and programming skills.
- Having experience in writing **testcases using Junit** for code coverage.
- Having Good Experience in Using JENKINS tool for CI & CD.
- Having Good Work Experience in using JIRA tool for Project Management.
- Having good experience with **Software Development Life Cycle Methodologies.**
- Having good knowledge in Bug Life Cycle.
- Good knowledge on **Amazon webservices, docker and Kubernetes.**

IT Knowledge Purview

Programming Language	Core java/J2EE, SQL, Python C++
J2EE Technologies	JDBC
Frameworks	Spring Boot, Hibernate
Web Services	RESTful, Microservices, AWS
Versioning Tools	Git, GitHub
IDE's	Eclipse, STS, Visual Studio
Tools and Utilities	Log4j, JUnit, Mockito
Database Technologies	MYSQL, POSTGRESQL
Devops Tools	Jenkins, Git, Maven, Docker, Kubernetes, AWS
Front-end technologies	HTML, CSS, JavaScript, JSON

Educational Details

- **B.TECH** from Madanapalle institute of technology Science [MITS]Affiliated to JNTU Anantapur from 2018 to 2021
- **Diploma** from govt polytechnic kalikari Affiliated to APSBTET from 2015 to 2018
- **10 TH** from Zphs school boorgmanda Affiliated to APSSC in 2015

Professional Experience

- Working as a JAVA Developer in Capgemini India PVT Ltd

Projects

Project No #1

TITLE : Synamedia
Role : Java Developer[Support]

Description:

Video Network Services Manager (VSM) is a customized Video Network Management System to define (templates/sources/devices/pools/capacity), configure (Devices, Lineups), activate configurations, monitor devices for connectivity and alarms and handle failures using redundancy defined in configurations. It is a server-client model, with server running on a Linux platform with separate SQL database. VSM supports both Native Java client (desktop client) and Web Browser based clients. The server is build using Java Spring boot framework and can use both REST protocol on the backend to communicate with the video network devices. Web Client is built using Angular framework and uses REST exposed by VSM for save/retrieve of data

Roles & Responsibilities:

- Involved in gathering the requirements, analysis, design & development of the project.
- Attending Scrum calls
- Participating in Spring Planning sessions and Retrospective Meetings.
- Involved in discussions for Developing Component classes using MVC pattern.
- Involved in code review using Sonar Qube.
- Involved in the Unit testing and Integration testing.
- Involved in Testcase review meetings

Project NO : 2 TITLE : HMA and GMA WEBDCS

Client : Hyundai Auto ever, USA
Role : Application Developer

Description:

HAEA provides a full range of Information Technology Services, spanning application services, business intelligence, integration, data security, infrastructure, and hosting services. By delivering competitive services, HAEA enables our clients to focus on running their core business, align IT capabilities to support business goals, and leverage technology to more effectively compete in the marketplace. HMA WebDCS is a web-based dealer communications system that allows Hyundai dealerships to view, input, and update information for a variety of operational functions related to Sales, Service, Warranty, Parts, and Finance. In HMA WebDCS, users are able to create an account and update account profile information. Also, users can reset password or receive user ID using "Log On Problems." If working for multiple dealerships, a user can switch dealership based upon granted access.

Roles & Responsibilities:

- Involved in the AGILE methodology for software development.
- Developed application using Java/J2EE platform, Html, Java script. Implemented the Model View Control (MVC) structure.
- Implemented server-side programs by using Servlet, JSP, and JDBC.
- Involved in creating basic SQL for CRUD operations and advanced SQL for procedures.
- Created DAO classes to implement CRUD operations by using JDBC transactions.
- Tasked with creating POJO classes as well as Login page server-side and client-side validation.
- Applied Java Collections such as HashMap, List to store data and passed along with JSP efficiently.
- Applied Object-Oriented Programming (OOP) principles by using Interface, Abstract, Overriding, and Overloading.
- Designed and developed very complex and large web pages using HTML, CSS, jQuery and Bootstrap for Dynamic web pages.
- Worked on form validation, error handling and event handling using JavaScript and jQuery
- Used Advanced Core Java concepts of Collections, Generics, Multithreading, Synchronization for Design Patterns.

✓ **Certifications:**

- Core java certification
- Trained on clouds and Devops tools (3 Month) – Capgemini Pvt Ltd
- AWS Certified DevOps Engineer - Professional:

Place: Bangalore
